## OBJECTIVES

To get a start as a Nipper, Underground truck driver or Service Crew member in the Australian hardrock mining industry. After 15 years of operating different machinery in a number of different jobs, including HR trucks, I am looking for a new challenge and I want a change of career into the mining industry. In order to do this, I have completed Underground Training's Introduction to underground mining program. Learning the systems of work and terms used in the Australian underground hardrock mining industry. While I have no practicable experience, I believe that I now have a firm understanding of what is going to be expected of me as Nipper, Underground truck driver or Service Crew member in an Australian underground mine.

## EDUCATION

### UNDERGROUND TRAINING (2019)

#### Introduction to Underground Mining

*Certificate of Achievement*

How a hardrock mine works  
Scaling  
Watering down  
Basic Service crew work  
General Mining Information
